

COMPANY DESCRIPTION/BOILERPLATE

Vectorworks, Inc.

100-word description

Vectorworks, Inc. develops design and BIM software that empowers designers across the built environment and entertainment industries to move from concept to final deliverables while preserving creative control. Its integrated platform combines 3D modeling, BIM, visualization, and documentation in a single interface, helping teams share ideas clearly, adapt to evolving project demands, and deliver exceptional experiences with open workflows and intelligent, cloud-enabled tools. The Vectorworks portfolio also includes the award-winning [Morpholio apps](#), extending the design process across mobile and desktop so ideas stay connected from inspiration to execution. Part of the [Nemetschek Group](#), Vectorworks supports designers in more than 85 countries. Learn how you can design without limits at vectorworks.net or follow [@Vectorworks](#).

PRODUCT DESCRIPTIONS

*50-word descriptions are evergreen product descriptions.

*100-word descriptions are the 50-word descriptions, plus Vectorworks 2027 insights.

Vectorworks Architect

50-word description

Built to help you design with creativity and control, Vectorworks Architect allows you to sketch, model, and document in an integrated workflow with the world's most design-centric BIM solution. Modernized textures, game-changing rendering and visualization, and a suite of documentation tools help deliver creative expression and maximum efficiency. vectorworks.net/architect

100-word description

Move from sketch to BIM with tools that support precise modeling, seamless collaboration, and intelligent documentation. Superior 2D graphics, 3D modeling, and visualization tools are designed to deliver absolute creative expression and maximum efficiency. Improved Doors and Windows, Georeferencing, and Phasing in Vectorworks Architect 2027 help you work smarter and faster with performance you can feel. With stunning textures via Texture Resource Modernization, community-built assets through The Exchange, and accelerated visualization features like the AI Visualizer with Nano Banana and Maxon's Redshift for Vectorworks, you can deliver high-quality designs without extra rework. Unlock performance and design without limits. vectorworks.net/architect

Vectorworks Landmark

50-word description

Balance creativity and constructability in your design, modeling, and presentation workflows with Vectorworks Landmark. The industry-leading BIM software solution supports your landscape projects with intelligent objects, powerful databases, precision volume analysis, and top-tier AI visualization. Feel empowered by streamlining integrated 2D and 3D landscape-specific sustainable BIM workflows in one application. vectorworks.net/landmark

100-word description

Design resilient landscapes with tools that connect terrain, planting, and documentation in Vectorworks Landmark, the industry-leading BIM software solution made specifically for landscape architects and designers. Transform your design, modeling, and presentation workflows with intelligent objects, powerful databases, flexible documentation, and cloud-based collaboration with Vectorworks Cloud Services. Balance creativity and constructability with Vectorworks Landmark 2027's Volume Fill tool, improved georeferencing, and AI visualization using Nano Banana. Save time and keep your work moving forward with refinements that help you see grading impacts clearly, batch-edit landscape styles, and streamline your plant selection and placement. Unlock performance and design without limits. vectorworks.net/landmark

Vectorworks Spotlight

50-word description

Vectorworks Spotlight is the market-leading solution allowing you to design, document, previsualize, and produce shows and events in a single tool. MVR and GDTF controls, an all-new way to visualize sound design, and top-tier AI visualization help you move from concept to a fully realized production with confidence. vectorworks.net/spotlight

100-word description

Stay ahead and at your creative best with Vectorworks Spotlight, the market-leading solution that allows you to design, document, previsualize, and produce shows and events. With extensive drawing, modeling, database, documentation, and industry-leading visualization tools, Spotlight helps you go from concept to fully created design within a single workflow. Elevate every project with Vectorworks Spotlight 2027's enhanced Schematic View Workflow, streamlined Cable Connectivity Workflows, and the new Audio Listening Plane for visualizing third-party sound analysis. Refined MVR and GDTF controls, plus exceptional AI visualization with Nano Banana, help you design, document, and previsualize faster. Unlock performance and design without limits. vectorworks.net/spotlight

Vision

50-word description

Previsualize your Vectorworks Spotlight show and event designs with Vision. Use MVR to send fixture and model information directly to Vision to previsualize, program, and cue your show without needing to be at the venue or having the crew on standby. vectorworks.net/vision

Braceworks

50-word description

The Braceworks® add-on module for Vectorworks Spotlight provides an easy and efficient way to gauge the performance of your suspended rigging system under load. Braceworks helps you maintain safety and compliance with engineering codes and local legal standards with a single modeling, analysis, and documentation process. vectorworks.net/braceworks

ConnectCAD

50-word description

From simple to complex, ConnectCAD takes the pain out of planning and installing large-scale A/V installations and other integrated systems. Create your system schematic and check for errors with automated commands. Ensure effective communication with your installation team and track and integrate on-site changes to deliver the final as-built documentation. vectorworks.net/connectcad

100-word description

From simple to complex, ConnectCAD takes the pain out of planning and installing large-scale A/V installations and other integrated systems. Create your system schematic and check for errors with automated commands. Ensure effective communication with your installation team and track and integrate on-site changes to deliver the final as-built documentation. ConnectCAD 2027 speeds up documentation with smart Socket Tool Defaults that remember your last-used settings and apply automatic naming. Comment directly on devices in shared reports with the new Cloud Document Reviewer and track project status at a glance with the added Progress Column. Unlock performance and design without limits. vectorworks.net/connectcad

Vectorworks Fundamentals

50-word description

Built to showcase your skill and creativity, Vectorworks Fundamentals offers superior 2D and 3D capabilities and an intuitive modeling and documentation platform. Freely sketch, model, and document your design ideas with precision drafting capabilities and the most flexible 3D modeling engine available, powered by SIEMENS Parasolid. vectorworks.net/fundamentals

Vectorworks Fundamentals

100-word description

Built to showcase your skill and creativity, Vectorworks Fundamentals offers superior 2D and 3D capabilities, intuitive modeling, and detailed documentation in a single CAD platform. Freely sketch, model, and document your design ideas with precision drafting capabilities and the most flexible 3D modeling engine available, powered by SIEMENS Parasolid. Vectorworks Fundamentals 2027 sharpens your workflow with Shaded Preview for 3D modeling tools, cleaner Complex Line Types, and a modernized Texture Resource system for richer materials. Generate stunning visuals in-app with the AI Visualizer's Nano Banana models, and dial in every viewport with the new DPI setting. Unlock performance and design without limits.
